

Using Firefox Browser with NTREIS Listings (Tempo) MLS

Some advantages of Firefox over IE is a little safer browsing. IE attracts about 60% more malware than Firefox. Firefox is a little faster, speed is always better! It has more customization features and it uses way less ram memory (a big factor).

I have found a simple solution that will allow you to use the Mozilla Firefox Browser with Tempo. To do so, you have to add one small add-on called IE Tab Plus. This add-on allows a “tab” to emulate an Internet Explorer tab or window.

1. To Start, just “Google” the words “free Firefox browser”. Or go here: www.mozilla.com/firefox/

2. Next download and install the IE Tab Plus add-on <https://addons.mozilla.org/en-US/firefox/addon/10909/>

An enhanced version of IE Tab with Adblock Plus in IE supported. It also allows you import settings from IE Tab and synchronize cookies between IE and Firefox. Supports Firefox 3.6 and beyond.

Updated	June 17, 2010
Website	http://ietab.com
Works with	Firefox 3.0 - 3.7a5pre
Rating	★★★★★ 149 reviews
Downloads	2,157,083

3. Be sure to “switch” the tab you are opening Tempo in to IE emulation. Once switched, your tab should have a small “e” to indicate that tab is in IE mode.

You can also choose a button for your toolbar which makes it easy to just click and select IE Tab
